

YASIR HUSSAIN

Karachi, Pakistan | (+92) 347 206 4310 | y.hussain90@hotmail.com | <https://yhussain09.github.io/>

I'm a Full Stack Java Developer with more than 6 years of experience. Currently, I'm a part of an agile team which is based in UK where I am developing highly scalable and reliable applications in a microservices environment using Spring Boot. I am well versed in CI/CD and DevOps technologies like Maven, Jenkins, Docker.

EXPERIENCE

Contour Software | Full time | Karachi, Pakistan | Hybrid

Jan 2023 – Present | Senior Software Developer

- Working on phase 2 of UK Renal Data Collaborative project.

Jun 2021 – Dec 2022 | Software Developer

- Wrote a script to automate the process of the installation of different versions of Clinical Vision (Java Web App) releases for Dev/QA environment and spin-up a new VM with all the pre/post requisite software's or tools. Also Integrate it with an existing CI/CD using Jenkins.
- Build a tool to pull out the information about report runtimes and parameters from customer's log files (crystal reports) to make it easier to investigate and dump the information into a database for further analysis.
- Added a new Interface in our existing Java based enterprise application named Clinical Vision. This interface is built for UK Renal Data Collaborative project which is used to Improves and standardize the scope and detail of renal center data. It also Improves and standardize data communications between UKRDC member organizations and between renal centers, allowing for the rapid transfer of a full patient record and full access to their data by patients.

Centegy Technologies | Full time | Karachi, Pakistan | On site

Feb 2021 – June 2012 | System Analyst

- Developed the web services for RASAYEE (B2B), MERCHANDISING (Promotions for B2B) and Tokrie (Order Booking App -B2C).
- Integrated Python based Machine Learning API with our Merchandising module to automate Product Compliance in Centegy's Sales & Distribution system.

Jan 2019 – Feb 2021 | Analyst Programmer

- I worked on core application framework using Spring Boot, Spring Data JPA and Spring Security.
- Developed a dynamic page designing studio that helps to incorporate business requirements without having the need to write code again.
- Developed a designer called dynamic scheme builder that helps to end user to design a scheme from component-based drag and drop user interface.

Aug 2017 – Jan 2019 | Programmer

- Revamp of Bancassurance module which is a part of Centegy's Ascent Insurance solution.
